

# VMS-Empire 1.17bbs

Version of VMS Empire for use as a BBS door

Official support sites: [Official Github Repo](#) - [Official Forum](#)

Set it up in scfg like this:

The screenshot shows a terminal window with the title bar "root@amigacity: /sbbs/doors/vms-empire". The terminal output displays the "Synchronet for Linux v3.17" banner and the date/time "Sat Nov 24 2018 11:33 pm". A menu titled "VMS Empire" is shown, with a list of options on the left and their corresponding values on the right. The "Command Line" option is highlighted. At the bottom, there are instructions: "F1 Help" and "ESC Exit".

	VMS Empire	
^ BBL	Name	VMS Empire
Boa	Internal Code	VMSEMPIR
Int	Start-up Directory	/sbbs/doors/vms-empire
Wor	Command Line	vms-empire -f %a -b
Arc	Clean-up Command Line	
Spo	Execution Cost	None
Puz	Access Requirements	
Sim	Execution Requirements	
Sci	Multiple Concurrent Users	Yes
In	Intercept I/O	Standard, No Echo
RPG	Native Executable	Yes
Pro	Use Shell to Execute	Yes
Str	Modify User Data	No
Mul	Execute on Event	No
Doo	Pause After Execution	Yes
⊥	BBS Drop File Type	None

When logging in it will now display the username it will be using, and if the optional "BBS Mode" is enabled it will be displayed as well. If testing I suggest making sure it has "Pause After Execution" is enabled so you can see more details.
